

FARMTECH FarmLink Lite

FarmLink Lite • User Guide v1.0 •
FarmTech Solutions, Inc.

FarmLink Lite provides the WiFi and internet connection for your system. It starts automatically and runs on its own – there is nothing to log in to and nothing to configure.

Connect in 3 Steps

1. **Power on the machine.** FarmLink starts automatically.
2. **Join the FarmLink WiFi** on your phone or tablet (details below).
3. **Open a web browser** and go to the address below.

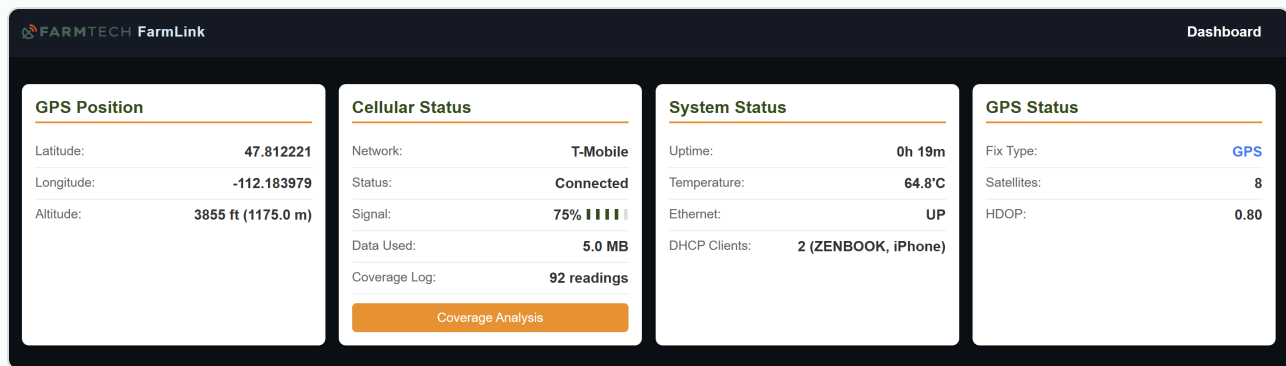

WiFi Network (SSID)	FarmLink-FL-L-2025-001
WiFi Password	FLL25001

Then open in any browser:

<http://farmlink.local:8080>

The WiFi name and password are also printed on the sticker on the FarmLink unit. If the WiFi network name on your machine differs from the one above, use the one on the sticker.

What You'll See

The FarmLink status screen at `farmlink.local:8080`

On the screen	What it means
GPS Status	Your position, number of satellites, and signal quality. A good fix needs a clear view of the sky.
Cellular	The internet connection. "Connected" means FarmLink is online.
WiFi	The local network your phone or tablet joined to reach this screen.

If "farmlink.local" Does Not Load

A small number of older phone browsers don't recognize the `.local` address. If the page does not load, use the backup address instead:

```
http://10.0.0.1:8080
```

This is the same screen — only the address is different.

Things to Know

- **It starts on its own.** Every time the machine gets power, FarmLink powers up and reconnects automatically.
- **The WiFi is for you, in and around the machine.** It is the network you join to see the screen – separate from the internet connection.
- **GPS needs sky view.** If GPS shows no position, make sure the antenna has a clear view of the sky and give it a minute.
- **Give cellular a moment after power-up.** It can take up to a minute to connect after the machine is first turned on.

Getting Help

If the status screen won't load, or cellular/GPS won't connect after a few minutes:

1. Turn the machine off, wait 30 seconds, and turn it back on. This clears most issues.
2. If it still won't connect, contact support@farmtech.us with your FarmLink serial number (on the unit sticker) and what the screen shows.
